

THE COOLING SYSTEMS FACTORY– PRUNDU BIRGAULUI

2008

The new RAAL investment - THE COOLING SYSTEMS FACTORY – PRUNDU BIRGAULUI is located at 22 km away from the present location in Bistrita, on a land covering an area of 73,000 sqm.

The factory has a built area of 19,000 sqm and will have all the necessary equipment for the complete cooling systems manufacturing dedicated for the agricultural and construction machines and equipment, as well as for the stainless steel heat exchangers manufacturing.

The factory will have two aluminum brazing lines and one stainless steel brazing line, a powder coating line in electrostatic field, robotized welding lines, a modern steel structures construction workshop, etc.

In the next stage a new R&D center will be developed on an area of 2,000 sqm, equipped with a wind tunnel, equipment for the cycle pressure test, vibrations test, and many others.

The investment is planned to ensure in 2008 a turnover of 30 million EUR, that will be made with 500 employees. That will allow the RAAL company to ensure in 2009 a turnover of 110 million EUR with 1900 employees.

Stage II (2008)

Stage I – completed

- 2007 – Cooling Systems Factory - in operation
- 2007 – Special Machines Production Plant – in operation

Raal will expand its current production capacity for automotive applications by installing 3 brand new manufacturing lines for oil coolers (brazed plate oil coolers and plate in-tank oil coolers) and CO2 condensers, dedicated to the European automotive manufacturers. One line, with a capacity of 300 kg/hour - 1 mil pieces/year, will be put in function in June 2008. The other two, with a capacity of 4 mil pieces/year, will be installed during the last quarter of 2008.
